Customizable Personal Program Selection Guide

	Product	Seed, Starter & In Furrow	Tillering	Flag Leaf / Boot	Comments
Select One	Ez-Gro Liquid Starter 5-15-5	3-5L/Strema in furrow or side dressing. Mix with 1MT water to cover field			Enhances Germination
	Life-T Starter 15-30-15	3-5kg/Strema in furrow or side dressing. Mix with 1MT water to cover field			Enhances Germination
	Ez-Gro Bloom Enhance	1L/MT of UAN			Increases Rooting
Select One	Ez-Gro Prime		500ml/MT water		Use with or without herbicides. Better establishment of seedling roots
	Betaine Prime		500ml/MT water		Use under drought stress
Select One	Ez-Gro Bloom Enhance			100ml/100L Foliar	Use at beginning of flowering to increase grain filling.

Greece

Selet	Enhance Bio-APP			50ml/100L Folier	Increases grain filling and drought protection
	ADD Ez-Gro 20-5-5 or Life-T 30-10-10			1L/Strema	Provides additional nutritional supply to sustain growth.
Environmental Protection Options					
	Aqua-Regulate	2-4L/MT water at first sign of drought - applied to foliage/soil to combat dehydration/crop loss while improving plant growth and survival.			
	Ez-Gro Secure	1-1.5L/MT water spray at onset of disease, enhances plants SAR metabolism with unique copper complex that reduces copper use.			
	Ez-Gro BR	500ml/MT foliar at beginning of drought/bud formation. Reduces environmental stress. Enhances yields.			
Deficiency Correctors					
	Ez-Gro High K (0-0-35)	Use 1L/MT as often as required			
	Cal Boost (Ca 10%) + kinetin, salicyclic and ascorbic acid	Use 1-3L/MT foliar			
	Ez-Gro Micro-Triacontanol	Use 500ml/MT to corret mirconutrient deficiencies
